

PUBLICATION OF RESULTS

CEMIG REPORTS 1Q16 EBITDA OF R\$ 643 MILLION

Main factors in the quarter

- Change in profile of allocation of supply in 2016
- Spot price significantly lower this year
- Significantly lower sales of gas to industry and thermal generation plants
- Negative equity contribution from Renova: significant impact

Indicators (GWh)	1Q16	1Q15	Change %
Electricity sold, GWh (excluding CCEE)	13,284	15,782	(15.83)
Indicators – R\$ '000	1Q16	1Q15	Change %
Sales on CCEE	2,630	1,010,932	(99.74)
Net debt	13,249,246	11,731,593	12.94
Gross revenue	7,354,294	7,941,700	(7.40)
Net revenue	4,451,660	5,849,279	(23.89)
Ebitda (IFRS)	643,331	2,578,893	(75.05)
Net profit in the quarter	5,207	1,484,627	(99.65)
Earnings per share	(0.004)	1.18	-
Ebitda margin	14.44	44.09	(29.65 p.p.)

Conference call

Publication of 1Q16 results

Video webcast and conference call

May 17, 2016 (Tuesday) : 11 AM, Brasília time

This transmission on Cemig's results will have simultaneous translation into English and can be seen in real time by Video Webcast, at <http://ri.cemig.com.br> or heard by conference call on:

+ 55 (11) 2188-0155 (1st option) or

IEEX	IEEX	-	27,859	24,803	12.32%

Source: Economática.

Trading volume in Cemig's preferred shares (CMIG4) totaled R\$ 2.84 billion in 1Q16, a daily average of R\$ 47.40 million. They handle in both its common (ON) and preferred (PN) shares, Cemig was the Brazilian electricity company with the highest trading liquidity, and one of the most traded Brazilian stock market.

On the New York Stock Exchange the volume traded in ADRs for Cemig's preferred shares (CIG) in 1Q16 was US\$ 442.3 million: we see this as reflecting recognition by the investor market of Cemig as a global investment option.

The São Paulo stock exchange (Bovespa) index – the Ibovespa – rose 15.47% in the quarter, closing the quarter at 50,055 points. Cemig's shares outperformed the principal Brazilian stock index and also the electricity sector index: the common (ON) shares rose 24.18% in the quarter, and the preferred (PN) shares rose 35.49%. The strengthening of both the Bovespa index and Cemig's share prices reflected the change in market expectations.

Cemig's long-term ratings

This table shows credit risk ratings and outlook for Cemig's companies as provided by the principal rating agencies:

Brazilian rating:

Agency	Cemig		Cemig D		Cemig GT	
	Rating	Outlook	Rating	Outlook	Rating	Outlook
Fitch	AA-(bra)	Negative	AA-(bra)	Negative	AA-(bra)	Negative
S&P	brA	Negative	brA	Negative	brA	Negative
Moody's	A2.br	Negative	A2.br	Negative	A2.br	Negative

Global Rating:

Agency	Cemig		Cemig D		Cemig GT	
	Rating	Outlook	Rating	Outlook	Rating	Outlook
S&P	BB-	Negative	BB-	Negative	BB-	Negative
Moody's	Ba3	Negative	Ba3	Negative	Ba3	Negative

Note: Fitch gives only Brazilian – not global – ratings.

On February 25, 2016, Moody's downgraded its Brazilian ratings for Cemig and its wholly-owned subsidiaries Cemig D and Cemig GT, and their debenture issues, from Aa2.br to A2.br; and their global ratings from Ba1 to Ba3. The outlook was changed to negative.

Adoption of IFRS

The results presented below are prepared in accordance with the new Brazilian accounting rules, which embody a process of harmonization between Brazilian accounting rules and IFRS (International Financial Reporting Standards).

Cemig's consolidated electricity market

The **Cemig Group** sells electricity through its distribution company, *Cemig Distribuição S.A.* ('**Cemig D**'), its generation and transmission company *Cemig Geração e Transmissão S.A.* ('**Cemig GT**'), and other wholly-owned subsidiaries: *Horizontes Energia*, *Termelétrica Ipatinga* (up to January 2015), *Sá Carvalho*, *Termelétrica de Barreiro*, *Cemig PCH*, *Rosal Energia* and *Cemig Capim Branco Energia* (up to March 2015).

The total for sales in Cemig's consolidated electricity market comprises sales to:

- (I) Captive consumers in Cemig's concession area in the State of Minas Gerais;
 - (II) Free Consumers in both the State of Minas Gerais and other States of Brazil, in the Free Market (*Ambiente de Contratação Livre*, or ACL);
 - (III) other agents of the electricity sector – traders, generators and independent power producers, also in the ACL;
 - (IV) Distributors, in the Regulated Market (*Ambiente de Contratação Regulada*, or ACR); and
 - (V) the wholesale trading chamber (*Câmara de Comercialização de Energia Elétrica*, or CCEE)
- (– eliminating transactions between companies of the Cemig Group).

In 1Q16 the Cemig group sold a total volume of 13,284 GWh. This volume was 15.8% less than its total sales volume in 1Q15.

Sales of electricity to final consumers plus Cemig's own consumption totaled 10,587 GWh, or 9.9% less than in 1Q15.

Overall, electricity consumption has been affected since 1Q15 by adverse Brazilian political and economic circumstances; and, in the captive market, by the successive increases in electricity rates charged to consumers, associated with application of the 'Tariff Flag' system, resulting in significant increases in consumers' electricity bills.

Sales to distributors, traders, other generating companies and independent power producers totaled 2,697 GWh – or 33.2% less than in 1Q16.

In March 2016 the Cemig group invoiced 8,120,322 clients – a growth of 1.9% in the consumer base in the year since March 2015. Of these, 8,120,262 are final consumers, including Cemig's own consumption; and 60 are other agents in the Brazilian electricity sector.

This chart shows the breakdown of the Cemig Group's sales to final consumers in the quarter, by consumer category:

Total consumption of electricity (GWh)

Consolidated	MWh		Change, %	Average price 1Q16 R\$	Average price 1Q15 R\$
	1Q16	1Q15			
Residential	2,490,519	2,563,143	(2.83)	812.54	603.46

Public authorities	215,405	217,588	(1.00)	624.15	486.26
Public lighting	329,062	331,051	(0.60)	418.96	302.52
Public service	292,885	316,384	(7.43)	467.58	343.97
Subtotal	10,577,488	11,736,387	(9.87)	497.82	361.92
Own consumption	9,452	9,819	(3.74)	-	-
Wholesale supply to agents in Free and Regulated Markets (*)	2,696,632	4,035,551	(33.18)	204.61	209.96
Total	13,283,572	15,781,757	(15.83)	445.27	325.63

(*) Includes Regulated Market Electricity Sale Contracts (CCEARs) and 'bilateral contracts' with other agents.

The electricity market of Cemig D

Electricity billed to captive clients and electricity transported for Free Clients and distributors with access to Cemig D's networks in 1Q16 totaled 10,460 GWh, or 3.3% less than in 1Q15.

There are two components of this reduction: Consumption by the captive market 5.5% lower year-on-year, and use of the network by Free Clients 0.5% lower.

In March 2016 Cemig billed 8,120,073 consumers, or 1.9% more consumers than in March 2015. Of this total, 445 are Free Consumers using the distribution network of Cemig D.

Consolidated	Number of clients		Change, %
	1Q16	1Q15	
Residential	6,566,165	6,429,953	2.1
Industrial	74,922	75,736	-1.1
Commercial, Services and Others	713,951	713,759	-
Rural	684,988	671,531	2.0
Public authorities	62,994	62,506	0.8
Public lighting	4,438	3,794	17.0
Public service	11,414	10,459	9.1
Total	8,118,872	7,967,738	1.9

Comments on the various consumer categories:

Residential

Residential consumption was 2,491 GWh of the electricity transacted by Cemig, or 2.83% less than in 1Q15.

The lower level of residential consumption is due to:

- Increases in rates, and application of the 'Tariff Flag' rates as from January 2015.
- Reduction in families' disposable income over the year 2015 and in the first quarter of 2016.
- Deterioration in family confidence.
- Fewer calendar days in first quarter 2016 (90.2 days) than in first quarter 2015 (91.8 days).

- Lower temperatures in 1Q16 than 1Q15, resulting in less use by consumers of air conditioners and ventilators in their homes.

Average monthly consumption per consumer in 1Q16 was 126.4 KWh/month, or 4.6% lower than the average for 2015 (132.4 KWh/month).

Industrial

Electricity used by captive clients was 7.9% of the volume of electricity distributed by Cemig, totaling 831 GWh in 1Q16, 12.6% less than 1Q15.

This is in line with the continuing retraction of economic activity both in Minas Gerais and in the whole of Brazil, and the performance of the international market:

- lower physical production, reflecting undesired inventory levels and less demand, leading to idle manufacturing capacity and lower use of labor;
- lack of entrepreneur confidence, and low levels of public and private investment;
- uncertainties in the Brazilian political and economic situation; and
- high cost of corporate credit due to high interest rates, and banks being more selective in granting loans.

The decline in consumption is seen in most areas of economic activity: food products (-3.9%), nonmetallic minerals (-17.0%), mining (-8.6%), chemicals (-11.6%), metallurgy/pig-iron (-30.1%) and metal products (-13.8%).

The electricity market of Cemig GT

Cemig GT's sales volume in 1Q16 was affected by termination of concession of plants. As from the termination, Cemig GT received payment for this output was under the Physical Guarantee Quota regime, and via settlement on the spot market.

Cemig GT's market comprises sales of power as follows:

- (I) in the Free Market (*Ambiente de Contratação Livre – ACL*) to Free Clients, either located in Minas Gerais or in other States;
- (II) to other agents in the electricity sector – traders, generators and independent power producers (in the Free Market);
- (III) to electricity distributors (in the Regulated Market – ACR); and
- (IV) sales in the CCEE (Wholesale Electricity Trading Chamber).

The total supply billed by Cemig GT in 1Q16 was 6,703 GWh, or 24.6% less than in 1Q15.

The number of clients billed by Cemig GT was 28.6% higher than at the end of March 2015, totaling 684. Of these: 623 were industrial and commercial clients, 47 were distribution companies, and 14 were companies in the category of traders, generators and independent power producers.

Free clients consumed 3,975 GWh in 1Q16, or 59.3% of the total electricity provided by Cemig GT, and 16.9% less than in 1Q15 – on the following main factors:

- reduction of consumption by industrial clients due to the continuous retraction in economic activity at state and national level in Brazil, and the performance of the international economy;
- lower availability of power for sale due to the conditions for renewal of concessions, as per Law 1303/2050 – this supply was redirected to the Physical Guarantee Quota regime; and
- shutdown of a mining operation in Minas Gerais state.

In 1Q16 Cemig GT added 113 new clients in the *Commercial* category, mainly outside the state of Minas Gerais.

Sales and trading transactions in electricity with other agents of the electricity sector in the Free Market lead to selling opportunities, which lead to short-term sales contracts. In 1Q16 total sales of electricity were 2,049 GWh, or 18.7% less than in 1Q15.

Sales in the Regulated Market, including sales to Cemig D, were 57.3% lower than in 1Q15, for several reasons:

- Cessation of contracts entered into as a result of the corporate reorganization of the Cemig group, with the transfer of assets from Cemig GT to Aliança Energia; and
- Termination of contracts made at the 18th Adjustment Auction, held in the first half of 2015, and the second 'Existing Supply' Auction, held in 2005 at governing the period 2005–2015.

Since September 15, 2015 the *São Simão* Plant has been serving the Regulated Market under the 'quota' regime, in accordance with Ministerial Order 432/2015. The company now recognizes only the revenue from provision of the services of operation and maintenance of the plant.

Physical totals of transport and distribution – MWh

Description	MWh		Change %
	1Q16	1Q15	
Total energy carried			
Electricity transported for distributors	84,955	87,127	(2.49)
Electricity transported for free clients	4,141,925	3,837,319	7.94
Own load			
Consumption by captive market	6,407,724	6,722,478	(4.68)
Losses in distribution network	NA	1,397,458	-

QUALITY INDICATORS – SAIDI AND SAIFI

Cemig is continuously taking action to improve operational management, organization of the logistics of its emergency services, and its permanent regime of preventive inspection and maintenance of substations, lines and distribution networks. It also invests in training of its staff for improved qualifications, state-of-the-art technologies, and standardization of work processes, aiming to uphold the quality of electricity supply, and as a result maintain the satisfaction of clients and consumers.

The charts below show Cemig’s indicators for duration and frequency of outages – SAIDI (System Average Interruption Duration Index, in hours), and SAIFI (System Average Interruption Frequency Index, in number of outages), since January 2015.

SAIDI (System Average Interruption Duration Index) – hours/consumer/month

SAIFI (System Average Interruption Frequency Index) – outages/consumer/month

Consolidated operational revenue

Revenue from supply of electricity:

Total revenue from supply of electricity to final consumers in 1Q16 was R\$ 5.915 billion, or 15.10% more than the total revenue of R\$ 5.139 billion in 2015.

Final consumers

Total revenue from electricity sold to final consumers, excluding Cemig's own consumption, in 1Q16 was R\$ 5.307 billion, or 23.65% more than the figure for 1Q15, of R\$ 4.292 billion.

The main factors affecting revenue in 1Q16 were:

- The Extraordinary Tariff Adjustment (RTE) for Cemig D (Distribution), which resulted in an average impact on consumers' tariffs of 28.76%, applicable from March 2, 2015.
- An annual tariff adjustment, with average effect on consumer tariffs of 7.07%, effective from April 8, 2015.
- Volume of electricity sold 15.83% lower.

	R\$		Change %	Average price 1Q16 R\$	Average price 1Q15 R\$	Change %

Wholesale supply to other concession holders (*)	551,762	847,299	(34.88)	204.61	209.96	(2,55)
Wholesale supply not yet invoiced, net	56,293	212	26.453.3	-	-	-
Total	5,914,813	5,139,029	15,09	445.27	325.63	36.74

(*) Includes Regulated Market Electricity Sale Contracts (CCEARs) and 'bilateral contracts' with other agents.

Revenue from Use of Distribution Systems (the TUSD charge)

The revenue of Cemig D (Distribution) from the TUSD in 1Q16 was R\$ 409 million, or 94.76% higher than in 1Q15 (R\$ 210 million). This reflects the impact of the tariff adjustments in 2015 – an increase of 96.21% for Free Consumers. The 2015 increases were mainly due to passing through of the CDE (Energy Development Account) amounts to the tariffs paid by consumers.

Revenue from transactions in the Wholesale Trading Chamber (CCEE)

Revenue from transactions in electricity on the CCEE in 1Q16 was R\$ 3 million, compared to R\$ 1.01 billion – a reduction of 99.7% year-on-year. This is mainly due to the spot price (*Preço de Liquidação de Diferenças*, or PLD) being 91.07% lower year-on-year in the wholesale market (at R\$ 34.69/MWh in 2016 compared to R\$ 388.48/MWh in 2015); and the lower quantity of electricity available for settlement in the wholesale market in 2016.

CVA and Other financial components in tariff adjustment

Due to the alteration in the concession contracts of the distributors, Cemig started to recognize balances of non-controllable costs to be passed through to Cemig D's next tariff adjustment. These comprised a reversal of R\$ 132 million in operational revenue in 1Q16. This compares with operational revenue of R\$ 550 million in 2015. This variation is principally due to the reduction of the costs of electricity acquired in auctions.

Sector / Regulatory charges – deductions from revenue

The sector charges that are effectively deductions from reported revenue totaled R\$ 2.903 billion in 1Q16, compared to R\$ 2.092 billion in 2015 – an increase of 38.77%. This principally results from the increase in the charges under the Energy Development Account (CDE), and the Tariff Flag charges.

The Energy Development Account – CDE

Payments to the Energy Development Account (CDE) are decided by an Aneel Resolution. The expenses included in the CDE are: concession indemnities, tariff subsidies, subsidy for balanced tariff reduction, low-income consumer subsidy, coal consumption subsidy, and the Fuels Consumption Account (CCC).

Charges for the CDE in 1Q16 were R\$ 600 million, compared to R\$ 298 million in 1Q15. This is the result of the new budget for the CDE since March 2015, in which Aneel increased the annual amount to be paid by Cemig D (which is passed through to the consumer in the Sector Charges component of tariffs).

Consumer charges – the ‘Tariff Flag’ system

With the creation of the *Tariff Flag* mechanism, Cemig had an account under Consumer Charges related to the Tariff Flag payments, totaling R\$ 273 million in 1Q16, compared to R\$ 87 million in 1Q15.

The ‘Flag Account’ (*Conta Bandeira*) was created on February 5, 2015, to manage the funds collected from captive customers of utilities of the national grid holding electricity distribution concessions and permissions – these were paid, on behalf of the CDE, directly to the Flag Account. The resulting funds are passed through by the Wholesale Trading Chamber (CCEE) to distribution agents, based on the differences between:

- (i) realized costs of thermal generation and exposure to short term market prices, and
- (ii) the amounts covered by the tariff.

The other deductions from revenue are taxes, calculated as a percentage of amounts invoiced. Thus their variations are, substantially, proportional to the changes in revenue.

Operational costs and expenses

Operational costs and expenses, excluding Financial revenue (expenses), totaled R\$ 3.949 billion in 1Q16, or 9.05% more than in 1Q15 (R\$ 4.342 billion).

The following paragraphs comment on the main variations:

Electricity purchased for resale

The expense on electricity bought for resale in 1Q16 was R\$ 1.931 billion, or 20.24% more than in 1Q15 (R\$ 2.421 billion). The main factors in the higher figure are:

Cemig D:

- Expense on electricity acquired in auctions 42.57% lower, at R\$ 665 million in 1Q16, compared to R\$ 1.159 billion in 1H15, mainly on on lower expenditure on fuel for generation by the thermal plants.
- Expense on electricity from Itaipu Binacional 14.36% lower, at R\$ 316mn in 1Q16, compared to R\$ 370mn in 1Q15. This is mainly due to (i) the lower tariff, which was US\$38.07/kw/month in 1Q15, but US\$25.78/kw/month as from January 2016; and (ii) the volume of electricity bought being 5.25% lower.
- The cost of purchases of supply in the short-term market was lower by 64.74% – at R\$ 86 million in 1Q16, vs. R\$ 245 million in 1Q15) – reflecting the lower cost of electricity in the wholesale market in 2015.

Cemig GT:

The expense on electricity bought for resale in 1Q16 was R\$ 660 million, or 8.55% more than in 1Q15 (R\$ 608 million). This reflects a higher average price per MWh (R\$ 134.74 in 2016, vs. R\$ 179.94 in 2015), with an offsetting effect from volume of electricity purchased in 1Q16 25.12% lower (4,510,660 MWh), compared to 1Q15 (3,669,685 MWh).

Operating provisions

Operational Provisions 486.05% higher year-on-year in the quarter – an expense of R\$ 252mn in 1Q16, compared to R\$ 43mn in 1Q15. The main factors in this result are:

- Higher provisions for doubtful receivables: R\$ 76 million in 1Q16, compared to R\$ 27 million in 1Q15 – mainly reflecting a higher level of default, influenced by the significant increase in consumer electricity rates put in place in 2015, and also the Brazilian macroeconomic context.
- Higher provisions for contingencies: in particular for employment-law litigation – totaling R\$ 50 million in 1Q16, compared to R\$ 16 million in 1Q15. There was also an increase in regulatory provisions – at R\$ 21 million in 1Q16, compared to R\$ 3 million in 2015, reflecting an infringement claim issued by Aneel, in the administrative sphere, related to assessment of electricity distribution services.
- This change mainly reflected provisions for the put options on equity interests in Parati (R\$ 79 million), and SAAG (R\$ 9 million), respectively.

a) Put options for Units in FIP Melbourne

Option Contracts for sale of Units ('the Put Options') were signed between Cemig GT and the pension plan entities that participate in the investment structure of SAAG, which those entities may exercise in the 84th month from June 2014. The exercise price of the Put Options will correspond to the amount invested by each pension plan company in the Investment Structure, updated *pro rata temporis* by the IPCA inflation index (*Índice Nacional de Preços ao Consumidor Amplo*, published by the Brazilian

Geography and Statistics Institute – IBGE), plus 7% per year, less such dividends and Interest on Equity as have been paid by SAAG to the pension plan entities.

To decide the method to be used for measuring the fair value of that option, since Madeira Energia is an unlisted company, the Company adopted the discounted cash flow method to measure the fair value of the options. The fair value of this option has been calculated on the basis of the estimated exercise price on the day of exercise of the option, less the fair value of the shares that are the subject of the put option, also estimated for the date of exercise, brought to present value at the interim reporting date, at the effective rate of 8% p.a. (discounting inflation effects). Based on the studies made, a liability of R\$ 157 million is recorded in Cemig GT, for the difference between the the exercise price and the estimated fair value of the assets.

b) FIP Redentor

Cemig granted to Fundo de Participações Redentor, which is a stockholder of Parati, an option to sell the totality of the shares which that fund holds in Parati, exercisable in May 2016. The exercise price of the option is calculated from the sum of the value of the amounts injected by the Fund into Parati, plus the running expenses of the fund, less Interest on Equity, and dividends, distributed by Parati. The exercise price is subject to monetary updating by the CDI (Interbank CD) Rate plus financial remuneration at 0.9% per year.

To decide the method to be used in measuring the fair value of this option, the Company observed the daily trading volume of the shares of Light, and also the fact that such option, if exercised by the Fund, will require the sale to the Company, in a single transaction, of shares in Light in a quantity higher than the daily exchange trading averages. Thus, the Company has adopted the discounted cash flow method for measurement of the fair values of the options. The fair value of that option was calculated as the amount of the exercise price estimated on the date of exercise, less the fair value of the shares subject of the put option, also estimated on the date of the

exercise of the option, brought to present value on the reporting date, at an effective rate of 7.5% p.a. (discounting inflation effects).

Based on the studies made, a liability of R\$ 1.324 billion is recorded in Cemig itself (the holding company), for the difference between the the exercise price and the estimated fair value of the assets.

On May 27, 2016, there will be an Extraordinary General Meeting of Stockholders to decide on changes in the agreement with FIP Redentor, including postponement of the date of exercise of the put option. For more details see the Convocation Notice:

http://cemig.infoinvest.com.br/enu/13511/conv_proposta_AGE27-05-16_ing.pdf

Personnel

Personnel expenses were R\$ 413 million in 1Q16, compared to R\$ 336 million in 1Q15, an increase of 22.92%. This arises mainly from the following items:

- Salary increases of 3% from March 2015, as a result of the collective negotiation decided by the courts on application from organizations representing the employees;
- Salary increases, under the Collective Agreement, of 10.33%, as from November 2015.

Number of employees

Gas bought for resale

The expense Cemig reports for Gas bought for resale was R\$ 238 million in 1Q16, vs. R\$ 262 million in 1Q15. This is basically due to a lower quantity of gas purchased (287,594m³ in 1Q16, compared to 380,666m³ in 1Q15) reflecting Brazil's economic downturn, which affected the industrial market, and also led to gas-fired thermoelectric generation plants being de-activated.

Market ('000 m ³ /day)	2012	2013	2014	2015	1Q16
Residential	-	0.17	0.72	1.04	1.57
Commercial	24.73	20.38	23.15	22.42	20.63
Industrial	2,740.00	2,734.95	2,849.24	2,422.78	2,116.84
Other	114.09	106.33	99.64	119.87	118.13
Total market excluding thermal plants	2,878.82	2,861.83	2,972.75	2,566.11	2,257.17
Thermal plants	746.09	1,214.50	1,223.99	1,309.13	918.21
Total	3,624.91	4,076.33	4,196.74	3,875.24	3,175.38

In the industrial market, the lower daily average of sales reflects reductions in economic activity in many of the industries served by Gasmig. Examples are:

- Metallurgy (-32%);
- Manufacture of machines and equipment (-26%); and
- Textiles and textile products (-16%).

The thermoelectric generation plants, which had been operating uninterruptedly since 2012, and now less in demand due to the lower demand for electricity, and also the higher levels of rainfall in the current rainy period.

Supply of gas for the residential market, which began in 2013, was connected to 4,645 homes in March 2016 (3,820 homes at December 31, 2015).

Fair value gain (loss) on stockholding transaction

In 2015 the Company posted a gain of R\$ 735 million arising from the constitution of *Aliança Geração de Energia*. On February 27, 2015, the transaction of association between Vale S.A. and Cemig GT by subscription of shares in *Aliança Geração de Energia S.A.* was completed. The two companies subscribed their shares in *Aliança* by

transfer to it of their interests in the following generation assets: *Porto Estrela, Igarapava, Funil, Capim Branco I, Capim Branco II, Aimorés* and *Candongá*. Aliança has installed hydroelectric generation capacity of 1,158 MW in operation (assured offtake level 652 MW), as well as other generation projects.

Since its creation, Aliança Geração de Energia has made a positive contribution to Cemig GT. In 1Q16 this interest provided Cemig GT with a gain of R\$ 24 million.

Equity gain (loss) in subsidiaries

In 1Q16 Cemig posted a net equity method gain of R\$ 58 million, which compares with a net gain of R\$ 90 million in 1Q15. This is mainly due to a loss of R\$ 152 million in 1Q16 in the jointly-controlled entity Renova Energia.

Investment in Renova – Loss due to impairment of assets available for sale

Option contract

A contract was signed on September 18, 2015 giving Renova the option to sell to SunEdison up to 7,000,000 shares in TerraForm Global, which Renova had received under the agreement in the first phase of the related asset exchange transaction.

The exercise price of this option was set at R\$ 50.48 or US\$15.00, at the exchange rate of the day, at SunEdison's choice. The contract also gave SunEdison an option to buy the same 7 million shares on the same terms.

Renova priced the option using the Black-Scholes mathematical model, the future expectation for the exchange rate, and the credit risk. Based on this valuation, a loss of R\$ 217 million has been recognized in 1Q16. Cemig's impact is R\$ 59 million, according to its 27.35% interest in Renova's stake.

Investment in TerraForm – pricing of the shares

The company also posted a loss in 1Q16, of R\$ 272 million, resulting from the fall in the stock price of TerraForm, in which Renova holds an equity interest of 11.42%, valued on the basis of the market price of the shares.

The figures above refer to the full impact on the financial statements of Renova. The effect for Cemig was proportional to its interest in the investee, valued by the equity method.

Financial revenue (expenses)

Cemig reports net financial expenses of R\$ 413 mn in 1Q16, compared to net financial expenses of R\$ 273mn in 1Q15. The main factors are:

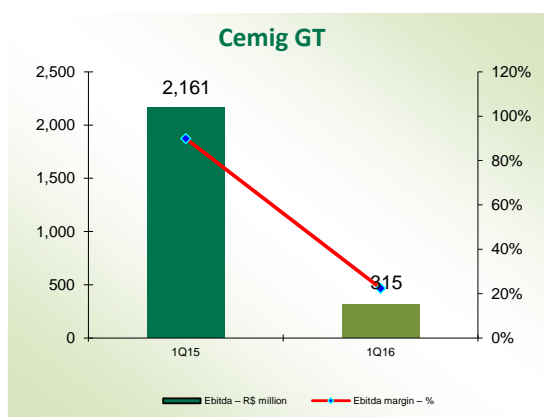

- Lower gain on updating of financial assets reported for the Remuneration Assets Base (BRR): R\$ 2mn in 1Q16, vs. R\$ 92mn in 1Q15. This is due to the BRR being lower, following the renewal of the concession contract in December 2015: on March 31, 2016 the amount of R\$ 164 million was classified in Financial assets (compared to R\$ 6.21 billion on March 31, 2015).
- Recognition of monetary updating on deposits linked to legal actions, representing a gain in Financial revenue of R\$ 31mn in 1Q16.
- Charges for loans and financings 46.08% higher, at R\$ 428 million in 1Q16, compared to R\$ 293mn in 1Q15. This mainly reflects higher debt indexed to the

CDI Rate; and also the higher variation provided by the CDI rate, itself, at 3,25% in 1Q16 compared to 2.81% in 1Q15.

EBITDA

Cemig's consolidated Ebitda in 1Q16 was 24.95% of its value in 1Q15 – a reduction of 75.05%. This mainly reflects: (i) recognition in 1Q15 of a gain of R\$ 735 million from calculation of fair value in a stockholding transaction; and (ii) much lower revenue from wholesale transactions on the CCEE – at R\$ 3 million in 1Q16, compared to R\$ 1.01 billion in 1Q15, due to the lower volume of supply de-contracted.

Ebitda – R\$ '000	1Q16	1Q15	Change, %
Profit (loss) for the quarter	5,207	1,484,627	(99.65)
+ Income tax and Social Contribution tax	26,533	573,695	(95.38)
+ Net financial revenue (expenses)	412,558	273,450	50.87
+ Depreciation and amortization	199,033	247,121	(19.46)
= EBITDA	643,331	2,578,893	(75.05)

DEBT

The Company's consolidated total debt on March 31, 2016 was R\$ 15.300 billion, 0.88% less than at December 31, 2015.

Debt amortization timetable (R\$ mn)

Cemig D has rolled over the greater part of its short-term debt: the balance payable in 2016 is R\$ 918 million. On March 22, 2016, Cemig D contracted with Caixa Econômica Federal a debt of R\$ 750 million at 132.14% of the CDI rate for a total of 48 months, with grace period of 18 months. On March 28, 2016, Cemig D concluded its fourth issue of non-convertible debentures, for a total of R\$ 1.615 billion, with maturity at three years. These funds were used to settle its eighth issue of Notes. Both these contracts allow for early payment without penalty.

On April 22, 2016 Cemig D rolled over debt of R\$ 600 million with Banco do Brasil, for interest of 128.00% of the CPI rate, and final maturity in April 2018.

Cemig GT has loans of R\$ 2.919 billion maturing in 2016, most of it in December.

Cemig GT	Maturity	Annual financial cost %	Total R\$ mn

Mining and Energy Ministry Ministerial Order 120

The Mining and Energy Ministry, through its Ministerial Order 120, of April 20, 2016, has set the criteria for indemnity of transmission assets. It states that the amounts that are approved shall be received in a period of eight years as from the 2017 tariff adjustment, and will be updated by the variation in the IPCA inflation index, and remunerated on the basis of the specific cost of capital of the transmission segment as defined by Aneel in the processes of periodic Tariff Review, estimated at 10.44% p.a. The Companies in the sector are in the process of obtaining more detailed explanations from the regulator on the criteria related to monetary updating and receipt of the indemnity.

The Valuation Opinion delivered to Aneel on July 31, 2014 represented an indemnity to the Company of R\$ 1.169 billion, at the base date of December 31, 2012.

On February 23, 2015, Aneel sent the Company the Report of Inspection with the preliminary review of the Opinion sent by the Company, corresponding to a price of R\$ 1.157 billion, of which R\$ 285 million was received in the first quarter of 2013 – the remaining balance being R\$ 872 million. Updating of this amount by the IGP–M inflation index to March 31, 2016 results in the amount of R\$ 1.085 billion (R\$ 1.054 billion at December 31, 2015).

Cemig GT is still in process of assessing the effects of the Ministerial Order, and has an estimate of an impact of approximately R\$ 500 million in financial revenue – which will be posted in the second quarter of 2016.

* Receitas anuais permitidas com vigência entre 1º de julho de 2015 e 30 de junho de 2016.

** A receita de transmissão da Transchile é dada em Dólar Norte Americano e é corrigida, anualmente, de acordo com o Decreto Nº 163 (http://www.cne.cl/images/stories/normativas/otros%20niveles/electricidad/DOC65_-_decreto163obrasurgentes.pdf).

DEFAULT

In 2015, to achieve economic and financial equilibrium for the companies of the sector, and synchronization between tariffs and the real variable costs of electricity, Aneel implemented the system of 'Tariff Flags', and also enacted an Extraordinary Tariff Increase, in March. These measures had an impact on electricity rates, involving as it did a pass-through of costs to final consumers.

In this context of an exceptional increase in electricity rates, Cemig has seen an increase in amounts invoiced that are not paid by final consumers, and this has resulted in growth in the stock of debt to levels higher than the average of recent months.

The average level of default during the month of January 2016 was 25% higher than in January 2015. This increased percentage of default has had a negative effect on the Company's cash flow.

Due to the present economic context, default has remained at a level that is high for the Company. The rate of default in January was 3.91%.

The Company uses various tools of communication and collection to prevent increase in default. These include telephone contact, sending of e-mails, use of text messages, and collection letters. We are also making efforts with the credit protection services – Serasa (*Serviço de Proteção ao Crédito*) and CDL (*Câmara de Dirigentes Lojistas*) – to register these arrears on their records for defaulting clients; and we are also applying disconnection of supply. Aneel Resolution 414 allows supply to be cut off after 15 days from receipt of a notice to the defaulting consumer.
